

**REMARKS**

Reconsideration of the present application is respectfully requested.

Claim 1 has been amended to further distinguish the present invention from the art of record. Specifically, claim 1 has been amended to further define the orientation of the respective peaks of the pair of projections of the lens member with respect to the optical devices. New claims 11-17 further define the pair of projections of the lens member and their respective orientations and therefore further distinguish the present invention over the art of record.

In view of the above amendments and remarks, the present application is now believed to be in condition for allowance. A prompt notice to that effect is respectfully requested. Please charge any unforeseen fees that may be due to Deposit Account No. 50-1147.

Respectfully submitted,
